Learn About:

- Brine shrimp and the health of GSL
- Water conservation
- Infectious diseases
- Air quality issues from a dry lakebed
- Agriculture
- Food security in Utah
- Rabies update
- And more!

This year the symposium will look at the intricate connections between landscape and human health through the lens of drought in Utah. We will explore the impact of drought on the Great Salt Lake ecosystem and on the wider Utah landscape.

**Rabies titer testing**

**CE credits for veterinarians**

**Viridian Event Center - West Jordan, Utah**
